Vancouver, Washington United States | (253) 335-8163

Summary

A versatile software developer with 6 months of experience, specializing in frontend development. Proficient in a broad range of technologies including React, TypeScript, Javascript, Firebase, Next JS, Tailwind CSS and Figma. Keen on building scalable, efficient and user-friendly application

Work Experience

Skinstric AI | Remote

Apr 2025 - May 2025

Frontend Engineer

- Architected real-time skin analysis platform using OpenAI Vision API and Next.js, achieving 98% detection accuracy across diverse skin conditions.
- Crafted a responsive UI with Tailwind CSS and custom JavaScript animations, implementing diverse skincare geometric mapping with 85% accuracy.
- Spearheaded the design and implementation of a modular component library using Tailwind CSS, resulting in a 30% reduction in code duplication and a 15% faster development cycle.
- Built custom animation system using vanilla Javascript for seamless user experience during skin analysis processing, increasing user retention by 40%.
- Implemented efficient image processing pipeline combining OpenAI Vision API with 4D Mini model for enhanced accuracy in skin tone and texture analysis using Base64 format.

NFT Internship | Remote

Mar 2025 - Apr 2025

Frontend Engineer

- Developed the front-end architecture of the NFT website, incorporating best tech practices increasing SEO score by 23%.
- Programmed on branching repositories. After assembly, testing, and resolving conflicts were 100% completed, then merging the consecutive branches to the main tree.
- Used best practices to create detailed Pull Requests in GitHub for the team and to provide the business with concise data on the production process and progress.
- Completed deployment using Vercel that succeeds with 99.9% site uptime.

Projects

Netflix Clone [Live Demo](#) | [Github Link](#)

Apr 2025 - Apr 2025

- Developed a high-fidelity Netflix design, incorporating a carousel with clickable media. Integrated firebase and user authentication to simulate a Log In/ Sign Up page that complies with Google's user privacy and safety with an 85% score.

Spotify Clone [Live Demo](#) | [Github Link](#)

Apr 2025 - Apr 2025

- Redesigned the loved style of Spotify's interfacing with full responsiveness whilst integrating a working play bar that is adaptable.

Search API Project: [Live Demo](#) | [Github Link](#)

Mar 2025 - Mar 2025

- Integrated a RESTful API with 99.7% uptime for anime with a fully responsive design, loading states & dynamic routing to interact with end users media and showcase anime on individual routes.

Core Skills

TypeScript | JavaScript | HTML | CSS | React | ReactJS | NextJS | Tailwind CSS | Firebase | Supabase | React Query | React Hook Form | ThreeJS | Vercel | GitHub | Vite | Figma | VsCode | RESTful APIs | React Router | Material UI (MUI) | SEO | Styled Components | Git | Docker | SQL | NodeJS | NPM.

Education

AMHS

Sep 2015 - Jul 2019

High School Diploma

Courses: FRC Robotics World Championship
